What’s a Mashup in Blackboard?

A Mashup is a feature in Blackboard that allows you to bring content from popular sharing sites such as YouTube, Flickr, and SlideShare into your course. Mashups make it simple to add multimedia content to enhance your course.

Step 1
To add a Mashup to content area click on Build Content. You will see all available sources listed under the Mashups heading.

Step 2
Once you choose what you want to include in our course you will be taken to a page to search for content within that source.

Step 3
The search will display many options for you to choose from that meet your parameters.

Step 4
Use the preview button to see the content before adding it to your course content.
Step 5
Click Select to add the content to your course.

Step 6
You will then be able to rename the Mashup and give it a detailed description.

Step 7
You can choose how and when you want it to appear in your course.

Click Submit. A success message will appear letting you know your Mashup has been inserted.
